## Summary

---

A highly motivated and curious B.Tech student specializing in Artificial Intelligence and Machine Learning at VIT Bhopal University. Passionate about solving real-world problems through coding, machine learning, and web development. Experienced in building ML-powered projects and developing user-friendly websites using HTML, CSS, and Python. Strong foundation in programming with C++, DSA, and SQL, and a creative flair with design tools like Canva. Always eager to learn, grow, and contribute to innovative projects.

## Skills

---

- C++, Python, DSA (Basics)
- HTML, CSS, SQL
- Canva, Excel

## Education

---

- |   |                   |
|---|-------------------|
| • <b>B.Tech in AI &amp; ML</b> , VIT Bhopal University<br>Expected Graduation: March 2027 | <b>CGPA: 7.67</b> |
| • <b>XII (State Board)</b> , Amaravati<br>Year: 2022                                      | <b>84.9%</b>      |
| • <b>X (State Board)</b> , Keshava Reddy School<br>Year: 2020                             | <b>97.6%</b>      |

## Academic Projects

---

- **Skill Spot**  
Volunteer recommender based on profile skills. Used HTML and CSS for frontend.
- **Tomato Quality Checker** (2024)  
Machine Learning model that predicts tomato quality based on an image. Built a basic website using HTML & CSS.
- **Medicine Recommendation System** (2025)  
Recommends medicine based on symptoms entered by the user. Also suggests diet and precautions. Developed using ML and a frontend with HTML & CSS.

## Hobbies

---

- Reading
- Drawing
- Yoga
- Music Listening
