Summary

Motivated B.Tech AI & ML student at VIT Bhopal with a strong passion for data science and machine learning. While I am at an early stage of my career with no formal industry experience, I am highly enthusiastic about learning, solving real-world problems, and contributing meaningfully. I am eager to leverage my academic projects and technical skills in an internship environment where I can grow rapidly and add value to the team.

Skills

Programming Languages :	C++, Python
Data Science & ML Libraries :	NumPy, Pandas, Scikit-learn (learning actively)
Machine Learning :	Supervised Learning, Classification, Regression
Web Development :	HTML, CSS
Tools and Platforms :	GitHub, Jupyter Notebook, Canva, Figma
Soft Skills :	Quick Learner, Problem Solver, Team Collaborator

Projects

Nucleus – LLM Context Compression Engine GitHub

Built a low-resource context compression engine that shrinks LLM prompts by over 70% (76.3% on benchmark code) while retaining 95%+ QA accuracy, giving a 1.85x latency speedup and lower inference cost. Implemented semantic deduplication, token-budget chunking, PII scrubbing and conversation-history compression behind a FastAPI service with SQLite persistence, API authentication, Docker and CI (InnovaHack Round 2).

LLM Firewall & Prompt Injection Shield GitHub

Developed a production-ready micro-SaaS API gateway to secure Large Language Models from prompt injection attacks, role-play exploits, and context hijacking. Built a FastAPI-based security layer with threat scoring, MongoDB logging, RapidAPI integration, and cloud deployment to detect and block malicious prompts before reaching LLM systems.

AI News Agent GitHub

Built an automated, resilient AI pipeline that curates AI news and delivers it to Telegram and Discord. Fetched real-time news via NewsAPI and used Google Gemini for high-quality summarization and punchy social media hooks, with exponential backoff for API reliability and GitHub Actions for 24/7 cloud-native automation.

Experience

Software Engineer Intern Certificate | Nov 2025 – Jan 2026

YugaYatra Retail (OPC) Private Ltd – Internship *India (Hybrid)*

Identified and reported functional bugs on live sites through hands-on testing, and proposed UI/UX improvements including image, content, and minor frontend suggestions.

Education

2027 (Expected)	Bachelor's Degree at VIT Bhopal University	(CGPA: 7.93/10)
2022	Amaravati, State Board (12th)	(84.9%)
2020	Keshava Reddy School, State Board (10th)	(97.6%)

Certifications

Advanced Software Engineering and AI Foundation – MPOnline Limited (May 2026 – Aug 2026) Link

Fundamentals of AI and Machine Learning – Vityarthi Link
